

Why More Houstonians Choose Sapphire Hydraulics as Their Local Hydraulic Repair Company

More and more businesses around the Houston area are discovering the perks and advantages of working with Sapphire Hydraulics for any needs they have in the area of hydraulic equipment. We understand that when your hydraulic machinery is down for any length of time, that means lost revenue for your company, and that can be disastrous to your bottom line. That's why we offer round-the-clock emergency service to repair your equipment so that you can continue working and meeting your business deadlines.

Even when deadlines are not involved, there will always be an urgency associated with completing a project, and if your hydraulic equipment is unavailable, that just won't be possible. Fortunately, our Sapphire Hydraulics specialists have diverse backgrounds in this industry, and there's virtually nothing they haven't seen and repaired already.

If it turns out that something needs to be custom-built, we can handle that too, because our hydraulic engineers have design skills as well as the ability to repair almost anything. When you need any kind of hydraulic repairs or maintenance, we hope you'll remember to contact Houston's premier hydraulics company, Sapphire Hydraulics.

Why Sapphire Hydraulics?

Sapphire Hydraulics is the company you should be working with whenever you have fluid power systems that require complete service from a highly qualified professional. We offer a full line of services to handle all your hydraulic needs, including maintenance, custom design and fabrication, repairs, and even emergency services.

We have a highly trained and skilled team of professionals, capable of making any kind of repairs or re-manufacturing hydraulic components for a wide variety of industries. We have a team available 24x7 every day of the week, and we can get to your

location, usually in less than an hour. We can provide you with free quotes on all repairs, so you know where you stand before any work even begins.

Our team has a great deal of experience, including more than 13 years of building custom hydraulic equipment, as well as doing all kinds of hydraulic maintenance. For a company with values, you won't find a better one in the industry, because we're a family-owned and operated company that places a premium on family values.

fittings or adapters, and we can make hose repairs under almost any conditions at your work site. No matter what kind of characteristics your hydraulic hoses have, whether related to pressure reading, hose size, or fitting configurations, we'll be able to handle both the hoses and the couplings expertly.

If need be, we can even provide a custom solution to any hydraulic hose or fitting problem you have, so that the solution does need to be revisited soon afterward. We can handle any kind of quick couplers,

Services Offered

We specialize in a number of hydraulic services that are essential for any company dealing with heavy equipment these days. Some of our most popular service offerings include:

Hydraulic Hose Repair

When you have a damaged hose or faulty coupling, it can take your entire hydraulic system out of whack and render it non-operational. We can be at your location in less than an hour to carry out needed repairs, and get your hydraulic hoses replaced, so the whole system can be back online as soon as possible.

We can work with almost any kind of industrial hose

adapters, hydraulic hoses, fittings, hydraulic fluid, or hose protection.

Hydraulic Cylinder Repair

Whatever the size of the machinery involved, we can provide expert hydraulic cylinder repair, and we always carry out all procedures in the safest manner possible. This is especially true when operating on large pieces of equipment, or those under high torque – whatever the situation, we'll get your hydraulic cylinders repaired and functional in the shortest time frame possible. We can have your system back up and running with your hydraulic cylinders repaired faster than any other company in the area.

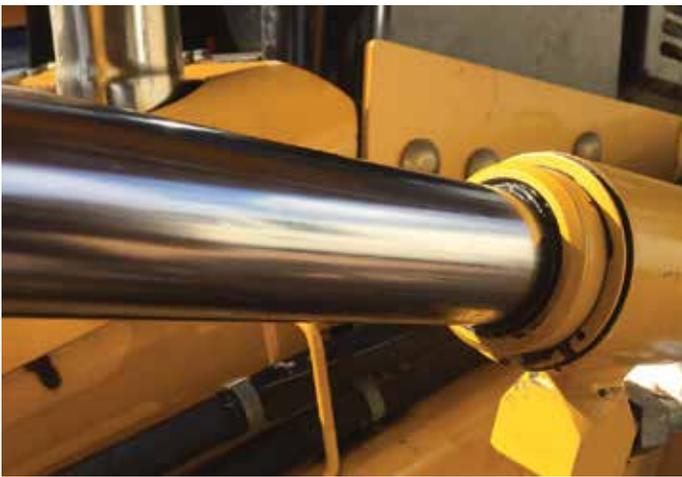

All of our service technicians have been thoroughly

SAPPHIRE HYDRAULICS

(713)331-1131

checked out by the Transportation and Safety Administration (TSA), and they all have Transportation Worker Identification Credentials (TWIC's). This means you can count on the work done by our specialists, and you'll also know that their professional attitudes will provide you with peace of mind that all work was done correctly. Our specialists work quickly and safely, using high-quality OEM parts to restore functionality to your system.

Custom Hydraulic Equipment

Whatever your specifications call for, we can supply custom-engineered and custom-manufactured hydraulic products, which can be used on a wide variety of applications, and across a number of different industries. We take great pride in the fact that we can work with you to custom-design almost any kind of equipment you need in the way of hydraulics.

Our knowledgeable and experienced hydraulic engineers will be glad to collaborate with you on the development of something totally unique, or something that is just a little beyond the standard parts currently available. Whatever your needs are, you can count on our experts to understand your vision and to faithfully translate it into a fully functional

and efficient hydraulic component.
